

# Viburnum cassinoides

## Wild Raisin

This plant's leaves are glossy green in the summer, but fall is when it really shines, putting on a colorful display. Leaves change first to orange-red then crimson and finally a deep rich purple. The real show-stopper is the fruit, changing from green to pink then red to blue and finally black.

**Suggested Companions:** arborvitae (Thuja occidentalis), black oak (Quercus velutina), black spruce (Picea mariana), golden alexanders (Zizia aurea)

Plant Type: Shrub

Size: 6-12' H  
6-12' W

Water Tolerant: Somewhat

Habitat:

Forested Upland  
Swamp/ Bog  
Shrubby Wetland

Soil: Rich Moist  
Very Damp/Wet  
Average Garden Soil

Exposure: sun  
filtered  
shade

Flower Color:  
White

Bloom Time:  
June

Plant in:

Groundcover: No

Other Attributes:

Fall color  
Wildlife attracting  
Butterfly attracting
